<b>I. 100K Add-On: LEPTIN</b>	+\$8
<b>J. 100K Add-On: A2</b>	+\$15

**DNA TESTING IMPORTANT INFORMATION**

- The DNA Testing Submission Form must be completely filled out on the front & back before sending to the lab. Forms that are incomplete are subject to a processing fee.
- **A \$10/sample fee will be charged** to all hair samples and semen straws. Neogen has implemented this fee due to increased processing and a higher percentage of retesting with hair samples. *Neogen is now charging for blood and hair cards. You can still order these cards from us for an additional fee. (\$1.50/blood card and \$2.50/hair card)*
- Neogen recommends using tissue samples as their preferred method of genetic testing. Tissue samples are preferred due to their ease of sampling, longer storage life, and quicker turnaround time. Tissue samples are taken using an Allflex applicator tool to remove a sample from the animal's ear into a small tube for storing the sample. If you are interested in using tissue sampling, contact Neogen to order your applicator tool and sample collection units.
- If you are testing an animal that is a twin, you can only obtain results through a hair or tissue sample. Do not send a blood sample for a twin.

**PLEASE SUBMIT COMPLETED FORM TO: Neogen - 4131 N 48th St. Lincoln, NE 68504**

**DO NOT SEND PAYMENT TO THE LAB. YOUR DIGITALBEEF ACCOUNT IS BILLED AT THE TIME YOU RECEIVE THIS FORM**

**ANY CHECKS SENT TO NEOGEN ALONG WITH THIS FORM WILL BE SHREDDED**
