<b>L.</b>	<b>100K Add-On : A2 (milk)</b>	+ \$15

***If you are a non-member, the cost per test is doubled.***

**DNA TESTING IMPORTANT INFORMATION**

- The DNA Testing Submission Form must be completely filled out on the front & back before sending to the BAA office. Forms that are incomplete are subject to a processing fee.
- **A \$5/sample fee will be charged** to all hair samples and semen straws. Neogen has implemented this fee due to increased processing and a higher percentage of retesting with hair samples. *Neogen is now charging for blood and hair cards. You can still order these cards from us for an additional fee. (\$1/blood card and \$2/hair card)*
- Neogen recommends using tissue samples as their preferred method of genetic testing. Tissue samples are preferred due to their ease of sampling, longer storage life, and quicker turnaround time. Tissue samples are taken using an Allflex applicator tool to remove a sample from the animal's ear into a small tube for storing the sample. If you are interested in using tissue sampling, contact Neogen to order your applicator tool and sample collection units.
- If you are testing an animal that is a twin, you can only obtain results through a hair or tissue sample. Do not send a blood sample for a twin.

**PLEASE COMPLETE ALL INFORMATION FOR EACH SAMPLE**
